

Call for Posters

HSUper Workshop for Beginners and Advanced HPC Users on 18.04.2024 & 19.04.2024

We cordially invite you to **present a poster at the HSUper workshop for beginners as well as advanced users**. The aim is to illustrate the **variety of topics and methodological approaches** in the broad world of HPC, to highlight different **research perspectives** as well as to enable an **interdisciplinary exchange**, all at a low-effort level.

Feel free to base your contribution on existing poster(s) (e.g. from prior conferences or workshops in your research field). If applicable, please include HPC-specific points (a) **how HPC is meant to support your research**, (b) **what you have already achieved leveraging HPC**, (c) **what HPC challenges and goals your current focus lies on**.

If you are attending both the beginner and advanced workshop, you can use the **same poster for both events**.

Please register for the workshop **until 29.02.2024** by sending an e-mail with subject line "Registration: HSUper workshop beginners" or "Registration: HSUper workshop advanced users" to workshop-hpcbw@hsu-hh.de.

Please **inform us when you register if you will be bringing a poster**.

You will find more information about our workshop [here](#):
