

Veröffentlichungen von Florian Jaehn

Aufsätze in begutachteten Zeitschriften und Proceedings

Air passenger preferences: an international comparison affects boarding theory. Erscheint in **Operations Research**, 2022, (mit E. Bachmat, S. Erland und S. Neumann).

The rebound effect in transportation. **Omega**, Volume 108, S. 102563, 2022, (mit F. Meissner).

Approximation algorithms for the twin robots scheduling problem. **Journal of Scheduling**, Volume 23, S. 117-133, 2020, (mit A. Wiehl).

Fair task allocation problem. **Annals of Operations Research**, Volume 284, S. 131-146, 2020, (mit C. Billing und T. Wensing).

Influencing Factors on Airplane Boarding Times. **Omega**, Volume 87, S. 177-190, 2019, (mit L. Hutter und S. Neumann).

An exact solution approach for scheduling cooperative gantry cranes. **European Journal of Operational Research**, Volume 273, S. 82-101, 2019, (mit J. Dornseifer und D. Krefß).

A generator for test instances of scheduling problems concerning cranes in transshipment terminals. **OR Spectrum**, Volume 41, S. 45-69, 2019, (mit D. Briskorn und A. Wiehl).

A description of supply chain planning problems in the paper industry with literature review. **Asia-Pacific Journal of Operational Research**, Volume 36, S. 1-39, 2019, (mit R. Juopperi).

Scheduling cooperative gantry cranes with seaside and landside jobs. **Discrete Applied Mathematics**, Volume 242, S.53-68, 2018, (mit D. Krefß).

Shunting operations at flat yards: retrieving freight railcars from storage tracks. **OR Spectrum**, Volume 40, S. 367-393, 2018, (mit A. Otto und K. Seifried).

Scheduling crossover cranes at container terminals during seaside peak times. **Journal of Heuristics**, Volume 24, S. 899-932, 2018, (mit A. Ehleiter).

A multiperiod auto-carrier transportation problem with probabilistic future demands. **Journal of Business Economics**, Volume 88, S. 1009-1028, 2018, (mit C. Billing und T. Wensing).

Scheduling position-dependent maintenance operations. **Operations Research**, Volume 65, S. 1657-1677, 2017, (mit M. Drozdowski und R. Paszkowski).

An integrated model for the transshipment yard scheduling problem. **Journal of Scheduling**, Volume 20, S. 57-65, 2017, (mit M. Cichenski, G. Pawlak, E. Pesch, G. Singh und J. Blazewicz).

Flight gate assignment and recovery strategies with stochastic arrival and departure times. **OR Spectrum**, Volume 39, S. 65-93, 2017, (mit U. Dorndorf und E. Pesch).

An FPTAS of minimizing total weighted completion time on single Machine with Position Constraint. **Leibniz International Proceedings in Informatics (LIPIcs)**, The 28th International Symposium on Algorithms and Computation (ISAAC), 19:1 – 19:13, 2017, (mit Calinescu, G., Li, M., & Wang, K.).

Sustainable Operations. **European Journal of Operational Research**, Volume 253, S. 243-264, 2016.

Scheduling with time dependent discrepancy times. **Journal of Scheduling**, Volume 19, S. 737-757, 2016, (mit H. A. Sedding).

Housekeeping: Foresightful container repositioning. **International Journal of Production Economics**, Volume 179, S. 203-211, 2016, (mit A. Ehleiter).

Shunting of trains in succeeding yards. **Computers and Industrial Engineering**, Volume 102, S. 1-9, 2016, (mit S. Michaelis).

Airplane boarding. **European Journal of Operational Research**, Volume 244, S. 339-359, 2015, (mit S. Neumann).

Minimizing delays in a shunting yard. **OR Spectrum**, Volume 37, S. 407-429, 2015, (mit J. Rieder und A. Wiehl).

Single-stage shunting minimizing weighted departure times. **Omega**, Volume 52, S. 133-141, 2015, (mit J. Rieder und A. Wiehl).

Multi-product batching and scheduling with buffered rework: The case of a car paint shop. **Naval Research Logistics**, Volume 61, S. 458–471, 2014, (mit S. Kovalev, M. Y. Kovalyov und E. Pesch).

Single machine scheduling with nonmonotonic piecewise linear time dependent processing times. **Proceedings of the 14th International Conference on Project Management and Scheduling**, S. 222-225, 2014, (mit H. A. Sedding).

A survey on container processing in railway yards. **Transportation Science**, Volume 47, S. 312-329, 2013, (mit N. Boysen, M. Fliedner und E. Pesch).

Exact algorithms for inventory constrained scheduling on a single machine. **Journal of Scheduling**, Volume 16, S. 105-115, 2013, (mit D. Briskorn und E. Pesch).

Positioning of loading units in a transshipment yard storage area. **OR Spectrum**, Volume 35, S. 399-416, 2013.

New bounds and constraint propagation techniques for the clique partitioning problem. **Discrete Applied Mathematics**, Volume 161, S. 2025–2037, 2013, (mit E. Pesch).

A note on “Multistage Methods for Freight Train Classification”. **Networks**, Volume 62, S. 80–81, 2013 (mit D. Briskorn).

Shunting yard operations: Theoretical aspects and applications. **European Journal of Operational Research**, Volume, S. 1-14, 2012, (mit N. Boysen, M. Fliedner und E. Pesch).

New bounds and algorithms for the transshipment yard scheduling problem. **Journal of Scheduling**, Volume 15, S. 499-511, 2012, (mit N. Boysen und E. Pesch).

Flight gate scheduling with respect to a reference schedule. **Annals of Operations Research**, Volume 194, S. 177-187, 2012, (mit U. Dorndorf und E. Pesch).

Scheduling freight trains in rail-rail transshipment yards. **Transportation Science**, Volume 45, S. 199-211, 2011, (mit N. Boysen und E. Pesch).

Extensions to STaTS for practical applications of the facility layout problem. **European Journal of Operational Research**, Volume 204, S. 463-472, 2010, (mit A. Junker und D. Scholz).

The emissions trading paradox. **European Journal of Operational Research**, Volume 202, S. 248-254, 2010, (mit P. Letmathe).

Solving the flight gate assignment problem using dynamic programming. **Zeitschrift für Betriebswirtschaft**, Volume 80, S. 1027-1039, 2010.

Modelling robust flight gate scheduling as a clique partitioning problem. **Transportation Science**, Volume 42, S. 292-301, 2008, (mit U. Dorndorf und E. Pesch).

A new branch and bound algorithm for the clique partitioning problem. **Operations Research Proceedings 2008**, S. 457-462, 2008, (mit E. Pesch).

Disruption management in flight gate scheduling. **Statistica Neerlandica**, Volume 61, S. 92-114, 2007, (mit U. Dorndorf, C. Lin, H. Ma und E. Pesch).

Modeling robust flight gate scheduling as a clique partitioning problem. **Proceedings of the 10th International Workshop on Project Management and Scheduling**, S. 175-179, 2006, (mit U. Dorndorf und E. Pesch).
