# Education in Turkey

European Studies in Education, Vol. 26  
2008, 304 pages, pb., € 34,90, ISBN 978-3-8309-2069-4

This book represents a major study of the development and present state of education in Turkey. Turkey offers a unique context for studying education because of the tensions that exist between secularization and Islam, top-down social engineering and democratization, and economic growth and social justice. Education in Turkey brings together some of the leading educationalists in Turkey, as well as a number of scholars from other disciplines. The topics covered include the development and structure of primary, secondary, vocational and adult education, the role of education in shaping citizenship and national identity, human capital, economic growth and educational ine-

qualities. This significant volume will be of particular interest to policy makers as well as researchers and students in education, economics, politics and Turkish studies.

## Contents
