

Directed Energy Research Seminar

The Technology Innovation Institute through its Directed Energy Research Centre and Khalifa University through its Advanced Power and Energy Center invite you to the first in a series of virtual seminars on high-energy physics and sensing technologies. To be held in June, the first seminar will focus on high-power electromagnetics.

Twelve leading international scientists in the field will speak during this seminar.

Email us at der_seminar@tii.ae

When?

04 & 05 June 2020

Albuquerque	UTC-6	06h00-11h00
Lausanne	UTC+2	14h00-19h00
Abu Dhabi	UTC+4	16h00-21h00
Xi'an	UTC+8	20h00-01h00

Seminar Platform

Zoom

Mark your calendars for other workshops in the series

High Energy Lasers (September 2020)

High Power Acoustics (November 2020)

Radar and Sensing (January 2021)

Organiser

The Technology Innovation Institute (TII) is a publicly-funded research institute, based in Abu Dhabi, United Arab Emirates. It is home to a diverse community of leading scientists, engineers and mathematicians.

Directed Energy Research Centre (DERC) at the Technology Innovation Institute (TII) has been founded to leverage applying cutting-edge advances in high energy physics.

The Khalifa University of Science and Technology is a world-class, research-intensive institution based in Abu Dhabi.

APEC

The Advanced Power and Energy Center of Khalifa University.
