

Formats and Criteria for the Bundeswehr Education and Training Convention 2020

Digital education and training: Will intelligence really become “artificial”?

I. Possible Contribution Formats

Workshops are interactive formats. The aim is for you to work together with the participants to produce a common result or product within a timeframe of 90 minutes. This may e.g. be shared positions, recommendations, guidelines or approaches to solving the issues and problems addressed. It must be possible to document the result so that it may subsequently be made available to the workshop participants.

In a **forum**, several speakers can present keynote speeches on the main topic and discuss them with the audience. If possible, each keynote speech should contain one or two theses, which will be discussed in greater depth and reflected upon critically together with the participants within a timeframe of up to 90 minutes.

A **presentation** allows you to present certain aspects, problems and questions regarding the main topic in more depth. The presentation should be structured to allow sufficient time for discussion with the audience afterwards. The timeframe available to you is 45 minutes.

Poster presentations (pitches) should be limited to 10 minutes. During these presentations, essential contents relating to the main topic should be presented to the audience. The posters should be visually appealing, have a logical structure and invite the participants to provide input.

II. Formal Criteria for the Submission of Contributions

You may submit your contributions either to the SCIENCE PANEL or the PRACTICE PANEL. For the assessment and final selection of contributions, different quality criteria apply for the respective panels, which are summarised in the following for your orientation:

SCIENCE PANEL

- Scientific relevance to the main topic of the convention
- Obvious relevance of the topic
- Clear presentation of the research interest generated by the contribution submitted
- Transparent presentation of issues and methods
- Good quality of the methodological approach, the data obtained and the evaluation
- Plausibility of scientific argumentation and consistency
- An international and interdisciplinary approach is desirable

PRACTICE PANEL

- Clear relevance to the main topic of the convention
- Clear relevance of the topic to basic, advanced and follow-on training
- Realistic possibility of directly implementing new ideas
- Clear practical relevance / best practice in the context of the respective institution
- If possible, relevance to pilot concepts / pilot projects of these institutions
- Information on implementation and on subsequent activities
- An international and interdisciplinary approach is desirable

III. Submission of Contributions

Please send us your contribution by **01 March 2020** (by 11:59 p.m.) and use the template which is available on the website for your abstract. Please also note that your abstract – provided it has been accepted – will be printed in the conference volume in the version submitted. Therefore, your abstract must not exceed a **maximum of 2,300 characters** (including blank spaces). **We also ask you not to submit contributions of a commercial character.**

We very much appreciate your interest and look forward to many contributions being submitted for the Bundeswehr Education and Training Convention 2020. Please do not hesitate to contact us under the contact data provided.
